To whom this may concern,

I, Les Van Hall, homeowner at 11654 Leda Lane, respectfully request that the Board consider Bryan Weed's zoning variance application to locate a pool pump and heater on the western side of his property rather than in the backyard, facing the conservation easement.

This equipment would be placed in between my home and the Weeds'. I see no objection to the matter, and would in fact prefer this alternative.

Respectfully,

Les Van Hall

To whom this may concern,

On behalf of the SabalWood at RiverRidge Homeowners Association, I respectfully request that the Board consider Bryan Weed's zoning variance application to locate a pool pump and heater on the western side of his property rather than in the backyard, facing the conservation easement.

Placing the equipment facing the conservation easement creates an unfair burden to the rest of the homeowners who face this area, as it would be visible from their backyards due to the shape of the conservation easement.

Respectfully,

B. Tortarelli Association President
Sabalwood @ River Ridge
